IMPACT: State

Summary of Legislation: This bill defines "high technology home health services" as home health services provided to an individual whose medical needs require high resource utilization. The bill requires the Office of Medicaid Policy and Planning (OMPP) to establish certain maximum payment rates for high technology home health services and to review these rates annually. (The introduced version of this bill was prepared by the Interim Study Committee on Medicaid Oversight.)

Effective Date: January 1, 2001 (retroactive).

Explanation of State Expenditures: This bill will increase state expenditures through the Medicaid program. Data does not exist to permit an estimate of the total impact to the state.

Background: The bill provides for higher payment rates for services provided by registered nurses (RN) and licensed practical nurses (LPN) to patients requiring high resource utilization, such as individuals who need ventilator care or tracheostomy care. Maximum payment rates are specified in the bill: \$32 per hour for services provided by an RN and \$30 per hour for an LPN. These specified payment rates represent a 17.9% increase over FY 2000 rates for RNs (currently at \$27.14) and a 47.1% increase over rates paid to LPNs (currently at 20.39).

Increased expenditures in the Medicaid program are shared with the federal government. The state share of expenditures is about 38%, while the federal share represents about 62%. The federal financial participation in the Medicaid program changes annually.

Explanation of State Revenues: See Explanation of State Expenditures, above, regarding federal financial participation in the Medicaid program.
